Honorable Donna Shalala
Secretary of Health and Human Services
Washington, DC 20201

Dear Secretary Shalala:

I am a state-licensed hearing aid dispenser/business owner in Illinois and Iowa, providing hearing care services to thousands of hearing impaired.

The FDA is about to put me, and others like me, out of business and impede hearing care services to millions of citizens nationwide. Hearing Instrument Specialists in both Illinois and Iowa are licensed to dispense hearing aids under the same testing, evaluation, and continuing education criteria as audiologists. The FDA is advocating a rule that would position audiologists, without justification, to be the sole gatekeeper to the hearing impaired.

There is no unqualified medical data that supports such a role is necessary for public health reasons. Actually, such a step would dramatically increase costs and significantly limit access to hearing care.

Please do not let the FDA put perfectly qualified Hearing Specialists and associated employees out of business, which also limiting health care access to the public.

Sincerely,

Ed Ciccarone, HIS
Owner, Hearing Systems, Inc.
